

SIEP 1

Apply your vinyl to your Scan n' Cut mat and cut your desired design.

STEP 2:

Weed your design by removing all of the negative areas that you dont want to apply.

STEP 3:

You may find a lightbox makes weeding the negative areas much easier.

STEP 4:

Apply the gridded transfer tape over your design, lining up the grids to ensure your design is straight.

STEP 5:

Use a scrapper or brayer over the transfer tape to ensure the top vinyl surface is properly adhered.

STEP 6:

Remove the release paper from the vinyl to expose the sticky side of vinyl.

STEP 7:

Line up your transfer tape over your preferred surface of your final project. Then press down once you're happy with the placement.

STEP 8:

Use a scrapper or brayer to fully adhere your design to your finished surface.

STFP 9.

Gently remove the transfer tape starting from one corner and pulling back.

STFP 10

Use the same technique to cut and stick down the base of the donuts.

STEP 11:

Then apply the same technique for the pink frosting of the donuts.

STEP 12:

Lastly, add the final embellishments, here I used confetti paste to give the look of sprinkles on the donut.
